Extraña paradoja

Publicado por: sedelu

Una grieta en su psiquis,
algo estaba mal,
sus sensores decían que existía una sobrecarga,
pero su sistema decía lo contrario,
era una real paradoja,
un "sin sentido",
¿existir en un mundo,
que no ha comenzado a crearse?,

Un submundo extraño,
encerrado en su corredor,
se mostraba ese "humano" desconcertado
quizás el primero
de ese Universo paralelo
elaborado por partículas subatómicas,
alargaba sus brazos,
tratando de entender su situación,
pero era muy poco tiempo,
para descifrar ese fenómeno,
ese viaje en el tiempo.

Debo vivir,
se repetía a si mismo,
era un extraño mensaje,
un código vital,
un impulso lo hace salir del corredor,
a pesar de los sensores,
comienza su génesis,
es el ADAN,
que busca afanosamente
desentrañar el misterio
